AI Engineer | Backend & Full-Stack Development

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, SQL, HTML/CSS, Bash

AI/GenAI: LangGraph, LangChain, CrewAI, OpenAI Agents SDK, AWS Bedrock, RAG

Backend, Cloud & DevOps: FastAPI, Spring Boot, Node.js, NestJS, REST APIs, OpenAPI, AWS (Lambda, Bedrock, EC2, S3, RDS), Docker, Kubernetes

Databases & Tools: PostgreSQL, MySQL, MongoDB, Git, Jira, Postman, WireMock, REST Assured, Agile/Scrum

RELEVANT EXPERIENCE

Software Engineer | [Asre Danesh Afzar](#) – Remote

May 2026 – Aug 2026

- Developed an AI-powered legal chatbot for tenancy inquiries using Python and AWS Bedrock AgentCore, Knowledge Bases, and RAG, achieving 90%+ response accuracy across 100 test queries.
- Architected multi-agent workflows for response generation, validation, and contextual reasoning, incorporating memory, guardrails, and AWS Lambda APIs to support scalable AI applications.

Software Developer Consultant | [Electric Mind Inc.](#) – Toronto, ON

Sep 2025 – May 2026

Canada Life Client:

- Engineered scalable Spring Boot microservices for a greenfield Investment Management platform, delivering document retrieval and client onboarding services for customer-facing financial workflows.
- Developed REST APIs and deployed microservices on Kubernetes, integrating with Apigee and enterprise platforms, enabling secure, scalable communication across 8+ integrated systems.
- Built automated unit, integration, and API testing with WireMock, REST Assured, and MockMvc, increasing automated test coverage to 80%+ to satisfy CI/CD quality gates.

Enercare Client:

- Migrated enterprise backend services from MuleSoft to NestJS, modernizing the backend architecture while maintaining integrations across Salesforce and enterprise systems.
- Migrated overdue-billing notifications from daily scheduled processing to Kafka-based event-driven workflows, eliminating up to 24 hours of notification delay.

Web Developer and XAI Researcher | [Collaborative Systems Lab](#) – Guelph, ON

Sep 2022 – Dec 2024

- Developed a full-stack React and Node.js platform integrating the YouTube API to automate participant workflows, streamline data collection, and support large-scale HCI research studies.

Full-Stack Web Developer | [Segal Pardaz Sina](#) – Remote

Jan 2019 – Sep 2020

- Developed and scaled an enterprise financial tracking platform using JavaScript, jQuery, Node.js, and React, supporting 1,000+ monthly clients and processing 10,000+ daily transactions.

AI PROJECTS

RolePlay | [GitHub](#) | React, TypeScript, FastAPI, LangChain

2026

- Built an AI-powered mock interview platform that personalizes interviews from PDF resumes and job-posting URLs using session-aware agent workflows.
- Implemented agent-driven topic tracking, follow-up question generation, conversational state, and structured post-interview evaluation with actionable feedback.

RepoPilot | [GitHub](#) | CrewAI, Python, Gradio

2026

- Built a multi-agent AI application that analyzes GitHub repositories and generates ranked, implementation-ready pull-request recommendations.
- Orchestrated specialized CrewAI agents for repository ingestion, codebase analysis, and report synthesis using custom tools, shared context, tracing, and structured Pydantic outputs.

EDUCATION

MSc Computer Science, University of Guelph — **GPA: 3.94/4.00**

BSc Software Engineering, IAUCTB University — **GPA: 3.67/4.00**
