Bridging Business Needs and Technical Solutions

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML/CSS, Bash

Backend: Spring Boot, Node.js, NestJS, Express, Django, REST APIs, OpenAPI, Auth0, Passport.js, OAuth2

Frontend: React, React Native, jQuery

Cloud & DevOps: AWS (EC2, RDS, S3, CloudFront), Kubernetes, NGINX, Maven

Databases & Testing: PostgreSQL, MySQL, WireMock, REST-assured, MockMVC, Postman

Tools & Methodologies: Git, GitHub, Agile, Scrum, Jira

RELEVANT EXPERIENCE

Software Developer Consultant | [Electric Mind Inc.](#) – Toronto, CA

Sep 2025 – May 2026

Leading Canadian Financial Services Client:

- Engineered Spring Boot microservices for a Greenfield Investment Management platform for a leading Canadian financial services client, following Agile development processes with Jira-based workflows.
- Implemented backend APIs for document retrieval and client account-opening workflows, enabling advisors and clients to onboard faster and access investment documentation more efficiently.
- Integrated Kubernetes (Lens), Apigee authentication, Kafka-based workflows, Maven, and enterprise API integrations to support secure backend communication and scalable service orchestration.
- Developed automated testing suites and quality engineering workflows including unit, integration, regression, WireMock, REST-assured, MockMVC, and Postman API testing.

Leading Canadian Energy Services Client:

- Migrated enterprise backend services from MuleSoft to NestJS within a microservice-based architecture.
- Built backend APIs and service layers to support multi-system integrations between frontend applications, Salesforce, and enterprise platforms, enabling seamless workflow automation.
- Developed automated billing and account-notification workflows, reducing manual processing and improving the timeliness and accuracy of customer communications.
- Partnered with cross-functional teams and client stakeholders in Agile development environments, leveraging sprint boards to coordinate development efforts and deliver features efficiently.

Software Engineer | [Asre Danesh Afzar](#) – Remote

Feb 2026 – Jun 2026

- Developed cross-platform mobile applications using React Native, integrating Node.js backend services, REST APIs, and SQL-based data systems in a remote Agile environment.
- Contributed to a volunteer-driven healthcare platform, implementing UI enhancements, troubleshooting application issues, and driving continuous improvements that improved performance and user experience.

Web Developer and XAI Researcher | [Collaborative Systems Lab](#) – Guelph, CA

Sep 2022 – Dec 2024

- Developed a React and Node.js research platform integrating the YouTube API and asynchronous backend workflows to streamline participant interactions and data collection for user studies.

Full-Stack Web Developer | [Segal Pardaz Sina](#) – Remote

Jan 2019 – Sep 2020

- Developed and scaled an enterprise financial tracking platform using JavaScript, jQuery, Node.js, and React, supporting 1,000+ monthly clients and processing 10,000+ daily transactions.

RELEVANT PROJECTS

BudgetApp / [GitHub](#)

2025

- Developed and deployed a full-stack budgeting web application using React, Node.js, PostgreSQL, and AWS (EC2, RDS, S3, CloudFront) with secure authentication and full CRUD functionality.
- Designed scalable REST APIs, normalized PostgreSQL schemas, configured HTTPS/NGINX deployment, and improved frontend performance through S3 + CloudFront hosting.

EDUCATION

MSc Computer Science, University of Guelph — **GPA: 3.94/4.00**

BSc Software Engineering, IAUCTB University — **GPA: 3.67/4.00**
