Full-Stack Software Engineer | MSc Computer Science & UX Design

SUMMARY

Full-stack Software Engineer with 4+ years of building scalable products and enterprise systems across financial, legal, and research domains. I bridge complex technical requirements with user needs, own features end-to-end, and deliver solutions that improve reliability, efficiency, and user experience.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL, HTML/CSS, Bash

Backend: Node.js, NestJS, Express, Spring Boot, FastAPI, REST APIs, Kafka, OpenAPI, OAuth2, Auth0

Frontend: React, React Native, jQuery, Motion, Figma, Three.js

Cloud & DevOps: AWS, GCP, Docker, Kubernetes, NGINX, GitHub Actions

Databases & Testing: PostgreSQL, MySQL, MongoDB, JUnit, WireMock, REST Assured, Postman

AI: AWS Bedrock, RAG, LangGraph, LangChain, CrewAI, OpenAI Agent SDK, Strands

Tools & Methodologies: Git, GitHub, Claude Code, Cursor, Codex, Agile, Scrum, Jira

RELEVANT EXPERIENCE

Software Engineer | [Asre Danesh Afzar](#) – Remote

May 2026 – Present

A technology company developing digital solutions across financial, payment, identity, and online services.

- Contribute to the development of a **legal tenancy support platform**, owning key features that connect individuals in need of legal assistance with **certified paralegals** and provide **AI-powered legal guidance** through a chatbot.
- Develop **React/React Native** interfaces, building UI components and improving user flows; **A/B testing increased paralegal bookings by 20%**, using behavioral data to guide UX decisions.
- Integrate REST APIs and **Node.js** backend services to support core application workflows, authentication, and frontend-backend communication.
- Contribute to a tenancy legal chatbot using **FastAPI**, **AWS Bedrock**, Knowledge Bases, and RAG, providing users with grounded answers based on relevant tenancy-law resources.
- Evaluate the chatbot across 100+ tenancy-related queries, achieving **90%+ response accuracy** based on relevance and factual correctness against retrieved legal sources.

Software Developer Consultant | [Electric Mind Inc.](#) – Toronto, ON

Sep 2025 – May 2026

A tech consulting firm delivering custom software and enterprise technology solutions across industries.

Canada Life Client:

- Engineered **Spring Boot microservices** for a greenfield **Investment Management platform** serving financial advisors and their clients, contributing to scalable backend services that supported core investment-management workflows.
- Owned backend development for **client account-opening** and **document retrieval workflows**, building REST APIs and service layers that connected frontend applications with enterprise platforms to automate cross-system processes.
- Integrated **Kubernetes**, **Apigee authentication**, and enterprise APIs to enable secure service-to-service communication and reliable orchestration across distributed systems.
- Built automated unit, integration, and API test suites using WireMock, REST Assured, and MockMvc, increasing automated test coverage to **80%+** and meeting CI/CD quality gates.

Enercare Client:

- Migrated enterprise backend services from **MuleSoft** to **NestJS/TypeScript**, modernizing legacy integrations within a scalable microservices architecture.
- Integrated **Auth0 authentication** into NestJS microservices, securing API access and enabling authenticated communication across enterprise systems.
- Developed backend APIs and service layers connecting frontend applications, Salesforce, and enterprise platforms, enabling automated cross-system workflows and data exchange.
- Migrated **overdue-billing notifications** from daily scheduled processing to **Kafka-based** event-driven workflows, enabling real-time delivery and eliminating up to **24 hours of delay**.

Hoodad Farhad

Canada, ON / hoodad.farhad@gmail.com / +1 (519) 820 9195 / [LinkedIn](#) / [GitHub](#)

Full-Stack Software Engineer | MSc Computer Science & UX Design

Web Developer and XAI Researcher | [Collaborative Systems Lab](#) – Guelph, ON Sep 2022 – Dec 2024

A human-computer interaction research lab focused on human-centred design, emerging technologies, and collaborative/social computing

- Developed a full-stack **React and Node.js research platform** integrating the YouTube API to support HCI studies, automate participant workflows, and streamline large-scale data collection.
- Designed research-focused UI components and user flows that improved participant onboarding and study task completion while enabling researchers to efficiently collect and manage study data.

Full-Stack Web Developer | [Segal Pardaz Sina](#) – Remote

Jan 2019 – Sep 2020

A software company developing financial management and business technology solutions.

- Developed and scaled an enterprise financial tracking platform using JavaScript, jQuery, Node.js, and React, supporting **1,000+ monthly clients** and processing **10,000+ daily transactions**.

Technical PROJECTS

RolePlay | [GitHub](#) | React, TypeScript, FastAPI, LangChain

2026

- Built an **AI-powered mock interview platform** that personalizes interviews from PDF resumes and job-posting URLs using session-aware agent workflows.
- Implemented **agent-driven** topic tracking, follow-up question generation, conversational state, and structured post-interview evaluation with actionable feedback.

BudgetApp | [GitHub](#) | React, JavaScript, PostgreSQL, Node.js, AWS

2025

- Developed and deployed a production-ready **full-stack budgeting application** using **React, Node.js, PostgreSQL**, and **AWS** with secure authentication and full CRUD functionality.
- Designed scalable REST APIs, normalized PostgreSQL schemas, configured HTTPS/NGINX deployment, and improved frontend performance through S3 + CloudFront hosting.

EDUCATION

MSc Computer Science, University of Guelph — **GPA: 3.94/4.00**

BSc Software Engineering, IAUCTB University — **GPA: 3.67/4.00**
